Abstract (en)
[origin: WO2018091526A1] The invention relates to a multi-layered herbicidal element that can be used in agriculture, horticulture and landscaping, as well as on pavings for driveways, yards, paths, terraces and similar, for environmentally friendly and sustainable weed control. The invention also relates to a method for processing and preparing the soil, particularly in horticulture and landscaping as well as in agriculture, and applying a multi-layered herbicidal element to the previously prepared soil.
