Abstract (en)

[origin: WO2018091309A1] The invention relates to a watch glass comprising a support (2) with at least recess (4), a cover (3), at least one gemstone (5) which is arranged at least partially in the recess (4), and a connecting intermediate layer (6) via which the cover (3) and the support (2) are connected to each other. One region of the upper part (50) of the gemstone (5) is in direct contact with the intermediate layer (6). The invention further relates to a watch comprising such a watch glass and to a method for producing said type of watch glass.
