Abstract (en)

[origin: WO2018093324A1] A collapsible table stand (1) has a supporting body (10) which comprises first and second sidewing brackets (12, 12') and an elongated main support structure (11) extending in a longitudinal direction (L) between the first and second sidewing brackets (12, 12'). First and second stands (20, 20') are pivotally attached to the supporting body (10) at or near its respective ends in order to allow the first stand (20) and the second stand (20') to extend or collapse relative to the supporting body (10). The elongated main support structure (11) of the supporting body (10) is provided with hooks (37, 38, 37', 38') at its ends, each hook (37) forming a slot (37a) for receiving a releasable fastening member (50, 51, 50', 51'). The releasable fastening member (50, 51, 50', 51') serves to anchor the first or second sidewing bracket (12, 12') to the elongated main support structure (11) as well as to anchor the first or second stand (20, 20') in an extended position relative to the supporting body (10). The table stand (1) may be comprised in a table (3) which furthermore has a table top (2) mounted on top of the table stand.
