Abstract (en)
[origin: WO2018092011A1] A method is described for making customized footwear, comprising the steps of acquiring at least one image of a foot of a user; making a three- dimensional model of the foot, constructed from said image; acquiring at least one image of a shoe selected by the client; acquiring standard sizes of the lasts provided for making the selected shoe; recognizing the standard size of the last closest to the features of the client's foot according to the three-dimensional model of the foot constructed; modifying the standard size of the closest last in order to obtain a "customized last" of the user's foot; producing, by means of 3D printer, at least one "customized last" for making the shoe; making the shoe according to said "customized last".
