Abstract (en)

[origin: WO2018091834A1] The invention relates to a method in which, having subjected the film (1) to a method for decoration by a printing technique, in various consecutive steps according to the number of colours sought, the film (1) is exposed to a cylinder (7) or an anilox roll/plate combination having hollow engraving capable of receiving a touch-sensitive varnish (V); the touch-sensitive varnish (V) is printed using the cylinder (7) or the plate on the film (1); and the film is cut in order to obtain the touch-sensitive IML labels.
