Abstract (en)
[origin: WO2018091363A1] Railway bogie comprising at least one axle box case for accommodating an axle box, further comprising a hydraulic spring and a bridging adapter. The hydraulic spring is located between a first end of the axle box case and a first end of the bridging adapter, and the second end of the axle box case is rotatably connected to the second end of the bridging adapter via a pivot bearing.
