Abstract (en)

[origin: WO2018091395A1] The invention relates to a method for dismantling offshore foundation structures comprising at least one hollow pile which, at its leading open end, is driven into the subsoil beneath the seabed in such a way that it encloses soil, wherein the hollow pile is hydraulically and/or pneumatically extracted. In particular, the method includes the extraction of the hollow pile in the form of a monopile (1).
