Abstract (en)  
[origin: WO2018091214A1] The invention relates to a timepiece comprising at least one hours indicator, one minutes indicator, a movement designed to drive the hours indicator and the minutes indicator, a dial, a crown and an indicator of at least one time zone, all housed in a first housing. According to the invention, the first housing is able to rotate inside a second housing about an axis of rotation in such a way that rotating the first housing in the clockwise or anticlockwise direction with respect to the second housing makes it possible to choose the time zone and indicate the time in the chosen time zone.
