Abstract (en)

[origin: WO2018091833A1] The present invention relates to an ACB (air circuit breaker)-type circuit breaker, primarily consisting of electromechanical elements for tripping and resetting a lock and provided with a pump-action reset lever (1), this circuit breaker taking the general shape of a housing enclosing said electromechanical elements, the front face of which housing has a compartment (2) in the shape of a long and narrow groove accommodating said pump-action reset lever (1), characterized in that the pump-action reset lever (1) has a telescopic rod (3) that can be deployed from a retracted position in which it is accommodated by the compartment (2) to a deployed position out of said compartment (2) when it is actuated for pumping. The invention more particularly applies to the field of electrical installations.
