Abstract (en)  
The present invention relates to a water sprinkler structure comprising a control bar (20) which is able to control water output from a plurality of nozzles (31). The sprinkler structure may comprise two chambers (13,14), each connected to at least one nozzle, access to each chamber being controlled by the control bar (20). Alternatively, access to a single chamber (13') may be controlled by the control bar (20), with the single chamber (13') being connected to a plurality of nozzles (31).
