Abstract (en)
[origin: WO2019179751A1] The invention relates to a truing device (1) for truing a grinding tool (2) having a specified grinding profile (14), wherein the truing device (1) comprises at least one first truing region (3) and a second truing region (4) connected thereto, wherein the first truing region (3) has a first specification for sharpening the grinding profile (14) of the grinding tool (2) and the second truing region (4) has a second specification, different from the first specification, for restoring the grinding profile (14) of the grinding tool (2), the first truing region (3) has a greater volume than the second truing region (4), the truing device (1) has a longitudinal axis (5), the two truing regions (3, 4) are arranged one behind the other in the direction of the longitudinal axis (5), and the truing device (1) is substantially cuboid.
