Abstract (en)
[origin: WO2018094434A1] The invention relates to a device for supporting a switch rail (11) of a switch, comprising a projecting leaf spring (8) which is biasable to the switch rail (11) and on which the switch rail (11) is displaceably arranged, wherein the leaf spring (8) is arranged so as to be adjustable in its longitudinal direction in a guide body (1) that can be fastened to the stock rail (3).
