Abstract (en)
[origin: WO2018095538A1] There is provided a safety strut (100) comprising an elongated first member (110), and an elongated second member (120), which are arranged for telescoping between a collapsed and an extended configuration. The safety strut (100) is arranged having a locking mechanism (130) arranged for when activated locking the safety strut (100) in a predetermined extended configuration, and an activation mechanism (133) for selectively activating the locking mechanism (130). A restoring mechanism (140) is arranged for restoring the activation mechanism (133) when the safety strut (100) is at a predetermined collapsed configuration.
