Abstract (en)
[origin: WO2018097795A1] A communication module (10) for ceiling mount comprising an attachment portion (12) arranged for mounting in the ceiling (4) of a room and communication means extending between opposite ends of the module and which are arranged to be connected with corresponding communication means in adjacent modules. Thereby, rooms can be furnished in an efficient manner, since craftsmen of different categories may work more efficiently. A method for manufacturing such a communication module and a method for completing a room having a floor and a ceiling using such a module is also disclosed.
