Abstract (en)
[origin: WO2018096328A2] Examples of a portable container (100, 200) are described herein. The portable container (100, 200) includes an insulative body (102) to hold a food item. The insulative body (102) may include an inner wall and an outer wall. Further, the portable container (100, 200) includes a temperature regulator (110) disposed between the inner wall and the outer wall of the insulative body (102). The portable container (100, 200) also includes a plurality of temperature sensors (202) disposed within the inner wall of the insulative body (102). The plurality of temperature sensors (202) being operably coupled to the temperature regulator (110). Further, the portable container (100, 200) includes a controller (210) communicatively coupled to the temperature regulator (110) to regulate the temperature of the food item based on a user input.
