Abstract (en)
A wipe dispenser support system (40) that includes an adjustable length base (42) and a cover (46) that is connected to the base (42) and constructed to cooperate with a dispense end of a container (22) of wipes (34). A lid (134) is connected to the cover (46) and movable between an open position and a closed position relative to the cover (46). A support (44) is connected to the base (42) such that the cover (46) and the support (44) are located at generally opposite longitudinal ends (47, 49) of the base (42). The base (42) preferably has a first portion (50) and a second portion (52) that are movable relative to one another such that the dispenser support system (40) is usable with wipe containers (22) of various sizes and shapes.
