Abstract (en)  
[origin: EP3546089A1] Disclosed is a twin-roller continuous casting device. The device comprises a first fixing device (20) for pressing a casting roller trolley (10) in a horizontal direction at a right angle to an axis of casting rollers (1a, 1b), so as to fix the casting roller trolley in the horizontal direction at a right angle to the axis of the casting rollers, and a second fixing device (40) for pressing the casting roller trolley in an axial direction of the casting rollers, so as to fix the casting roller trolley in the axial direction of the casting rollers. The casting device can easily replace a pair of casting rollers, and can fixedly support the pair of casting rollers at a correct position.
