Abstract (en)

The present invention concerns a method for the realization and laying of a coating structure (1) comprising the steps of providing for a rigid bedplate (4) with a substantially horizontal extension; applying at least one net (3) on said rigid bedplate (4) comprising one layer (5) of perforated sheet material on which a plurality of tesserae (7) are glued spaced apart from each other; preparing at least one mixture of liquid material; pouring said mixture of liquid material onto said net (3); spreading said mixture to form a layer of mixture (8) of liquid material, adapted to be distributed at least in the space comprised between said plurality of tesserae (7).
