Abstract (en)

The present invention proposes a fence post (1) mainly comprising a vertically elongated center portion (13), a vertically elongated outer portion (11) connected to said center portion and at least one attaching means (3) for securing at least one fence panel (2) on said fence post. Here, the outer portion of the fence post has an outer face, a rear face, and at least one longitudinal channel (15) forming an inner aperture constituted between the outer face and the rear face as to extend along the entire length the outer portion.
