Abstract (en)
[origin: EP3546831A1] Gas cock with a safety valve for a gas cooking appliance, comprising a body (10) comprising an inlet conduit (11) communicated with the safety valve (30), and at least one outlet conduit (12); a regulating element for regulating the incoming gas flow in from the safety valve (30) to the outlet conduit (12) depending on the angular position thereof; and a drive shaft (40) with a manually operable main shaft (41) axially movable for acting on a transmission element (70) for opening the safety valve (30), the regulating element rotating integrally with said main shaft (41). The regulating element is a rotating disk (20) with at least one connection opening (21) which is configured for supplying different types of gas depending on the angular positioning of the rotating disk (20) with respect to the main shaft (41).
