Abstract (en)
The present invention relates to a locking mechanism (20) for a door (12) of a domestic appliance (10), in particular for an oven door (12) of a cooking oven (10). The locking mechanism (20) comprises a spring element (24) attachable or attached at the domestic appliance (10). The locking mechanism (20) comprises a lever element (26) attached at a distal end of said spring element (24). The lever element (26) is adapted for engaging with a section of an edge of the door (12), when said door (12) is in a closed state. The spring element (24) is bendable, so that the lever element (26) can be disengaged from the section of the edge of the door (12).
