Abstract (en)  
[origin: WO2018099863A1] The present invention relates to a device (1) for treating the hair, comprising: - a structure for accommodating a refill (10) of hair treatment product, - a steam generator for outputting steam onto the hair at a rate of less than 10 g/min, - a refill detection element that detects said refill when it is mounted on the accommodating structure, the device (1) being designed to pass into a refill-free mode if no refill (10) is detected by the detection element, the operation of the steam generator in this refill-free mode being different than its normal operation when a refill is present.
