Abstract (en)

[origin: WO2018100194A1] The present invention relates to a packaging comprising two detachable elements respectively formed from cutouts of sheet-form card or corrugated card material, a first element forming the base (1) of the packaging and a second element forming the lid (2) of the packaging, the cutouts (3, 3') of the first and second elements comprising two main flaps, a first main flap (4) forming the bottom of the packaging and the top of the packaging respectively, and a second main flap (5) forming the side walls of the packaging, said flaps (4, 5) being connected by a first fold line (6) directly or by means of a secondary flap, and a set of lateral tabs (7, 8) arranged on either side of at least one of said main flaps (4, 5) and connected to said main flaps by second fold lines (9) perpendicular to the first fold line (6) so that said elements exhibit the overall shape of a letter L; said packaging being notable in that the first main flap of the cutouts (3, 3') of the first and second elements is of quadrilateral shape and the four corners thereof are chamfered (10).
