Abstract (en)
[origin: WO2018099925A1] The head comprises: - a duct for preparing and for distributing the cosmetic composition, comprising a distribution nozzle and a distribution cannula mounted protruding from the nozzle. The distribution nozzle comprises an external skirt (44) that has an inner passage that has a first transversal section, the distribution cannula comprising a first portion (46) cooperating with the external skirt (44). The first portion (46) comprises a sealing edge engaged in a sealed manner around the external skirt (44). The distribution cannula comprises a second portion (30) protruding from the first portion (46), defining an inner channel for the delivery of a product, the inner channel having a second transversal section different from the first transversal section.
