Abstract (en)
[origin: WO2018100289A1] The invention relates to a processing method for a processing device (3, STB) associated with a retrieval device (1). The processing device is driven by a control device (2) and is able to control the retrieval of data on the retrieval device. The method comprises, on the processing device, the following steps: - reception of data (E10, E15) to be retrieved on the retrieval device; - obtaining (E11) of a motion information item originating from the control device (2); - processing (E13) of the data to be retrieved as a function of the motion information item received, independently of an initial position.
