Abstract (en)

[origin: WO2018099696A1] The present invention relates to a cover device (100) for covering a sheath clamp on a terminal block (102), comprising an insulating body (101), which is designed to rotatably support a nut (103), and a protection against loss (105) in order to fasten the insulating body (101) to a terminal block (102), wherein the protection against loss (105) is designed as an elastic tab.
