Abstract (en)

[origin: CN209720015U] A packaging apparatus (1) for a merchandise (5) such as a beverage container or the like is disclosed. The packaging device (1) comprises at least one conveying part (24) driven in a circumferential mode and a plurality of specification parts (8) capable of being fixed to the at least one conveying part (24) driven in a circumferential mode. Furthermore, the packaging device (1) comprises at least one manipulator (50, 50') designed to operate the specifications (8), said at least one manipulator being provided for independently fastening the plurality of specifications (8) to at least one circumferentially driven transport element (24) at a defined separation distance.
