Abstract (en)
[origin: EP3550038A1] The present disclosure relates to a facility for producing sintered ores. The facility may include: sintering vehicles movable along a traveling path; a plurality of wind-boxes arranged along the traveling path and below the sintering vehicles; a hood disposed above the sintering vehicles and extending along at least a portion of the traveling path; and an exhaust gas circulation pipe for connecting at least some of the plurality of wind-boxes to the hood. In addition, the exhaust gas circulation pipe at least partially may have at least one exhaust gas distribution region for distributing the exhaust gas in a flow direction of the exhaust gas to efficiently circulate the exhaust gas, thereby improving quality and productivity of the sintered ores.
