Abstract (en)

The compressor system includes guide pipes (30A and 30B) fixed to a housing (11), and suction pipes (26A and 26B) inserted through suction ports (23A and 23B) formed in a cylinder accommodated in the housing (11). The guide pipes (30A and 30B) each have a guide pipe widening diameter portion (303A) having a diameter that gradually increases. The suction pipes (26A and 26B) have a suction pipe widening diameter portion (263A) having a diameter that gradually increases from a suction pipe small diameter portion (261A) side inserted through a guide pipe small diameter portion (301A) toward a suction pipe large diameter portion (262A) having a diameter larger than that of the guide pipe small diameter portion (301A), and having an outer circumferential surface that abuts an inner circumferential surface of a guide pipe widening diameter portion (303A).
