Abstract (en)
[origin: EP3550413A1] A touch display panel, a display device and a touch panel are provided, the touch display panel includes a plurality of block touch electrodes (10) spaced apart from each other and a conductive shielding layer (20), the shielding layer (20) is insulated from the touch electrodes (10); and an orthographic projection of the shielding layer (20) on the base substrate (90) in the touch display panel is at least in a gap between orthographic projections of the touch electrodes (10) on the base substrate (90), and the touch display panel improves the capacitance uniformity of a capacitive touch display panel.
