Abstract (en)
[origin: WO2018109619A1] The invention relates to a method for coating a base element (1) for a household appliance component. The method comprises at least the steps of depositing at least one silicon dioxide containing layer (2) onto at least one surface of the base element by combustion chemical vapour deposition and coating at least a portion of the at least one silicon dioxide layer using at least one fluorosilane. The invention further relates to a household appliance component comprising a coated base element (1) and to a household appliance comprising at least one household appliance component (1).
