Abstract (en)  
[origin: WO2018104637A1] The invention relates to a device for covering a gutter (C) including a series of covering elements (1, 2, 3) including a pin at a first end and an opening at a second longitudinally opposite end, a first rail (4) and a second rail (5). The first rail (4) includes at least one first gusset and one second gusset, each of said gussets forming a knuckle. The pin of a first covering element (1) passes through the knuckle of the first gusset, and the pin of a second covering element (2) passes through the knuckle of the second gusset and projects beyond said second gusset so as to be inserted into the opening of the first covering element (1).
