Abstract (en)  
[origin: WO2019013725A2] The present invention relates to a hole cover (1) comprising at least one cap (2) which is at least in size of the hole it is covering and fits into the inlet of the hole, at least one stem (3) which enters into the hole, is smaller than the size of the hole, and one end of which is connected to the cap (2), at least two hooks (4) which protrude towards the edges of the hole from the other end of the stem (3), which bend in a concave way first towards the outlet of the hole and then in a convex way towards the edges of the hole, and which have the width to apply pressure on the edges of the hole while they are in the hole.
