Abstract (en)  
[origin: WO2018104530A1] The invention relates to a clutch friction disc (100) comprising: - an annular web (104) capable of being mounted around a rotating shaft; - a support disc (101) supporting friction linings (102); a device (120) for damping acyclicisms, comprising a first and a second guide washer (121, 122) rigidly connected together and each provided with windows (125a, 125b) receiving a circumferential effect resilient system; - a first friction washer (130) mounted between the first guide washer (121) and the support disc (101) and attached to the annular web (104); and - a second friction washer (140) mounted between the first friction washer (130) and the annular web (104) and attached to the first guide washer (121).
