Abstract (en)
[origin: WO2018104381A1] The invention relates to a socket contact (1) and to a method for producing a socket contact (1) from a round bar (13), comprising the following steps: • producing a hollow cylindrical contacting region (2) at a first end (3) of the round bar (12), by means of extrusion, said hollow cylindrical contacting region (2) having contact segments (4) which extend in the longitudinal direction (L) of the contacting region (2) and are separated from one another in the peripheral direction of the hollow cylindrical contacting region (2) by means of recesses (5), said recesses (5) being produced during extrusion.
