Abstract (en)
[origin: EP3553252A1] The invention relates to the production of construction materials. The invention gives the possibility of producing two-layer floorboards of unlimited and easily changeable length, and also use raw materials almost fully. The two-layer floorboard includes a glued together upper layer (1) made of rectangular elements of solid wood lamella (3), which are connected along the line (4), which is perpendicular to side edges (7) of the floorboard, and lower layer (2) made of wood board elements (5), which are connected along a line (6) which forms a 30-80° angle (8) with side edges (7) of the floorboard.
