Abstract (en)

Disclosed is an adjusting method of an air conditioner, including the following operations: acquiring a time point corresponding to the adjusting instruction and a first target value corresponding to the adjusting instruction, under the condition that an adjusting instruction is detected triggered based on a first air conditioning parameter variation curve; and updating the first air conditioning parameter variation curve according to the time point and the first target value, to control the operation of the air conditioner according to the updated first air conditioning parameter variation curve. The present application further discloses an air conditioning device for an air conditioner and a computer readable storage medium.
