Abstract (en)

[origin: WO2018112488A1] A cross-country skiing kit with a cross-country ski binding (1) and with a cross-country ski boot (2), wherein the cross-country ski binding (1), for articulated connection of a cross-country ski boot (2) to a cross-country ski (3), is provided with a substantially unyielding binding main body (4) which has a stand surface (5) for a sole (6) of the cross-country ski boot (2), with a holder device (7) which has a seat (8) for pivotable arrangement of the cross-country ski boot (2) about a pivot axis (10) extending in the transverse direction of the binding main body (4), with an elastically deformable resetting element (13) for resetting the cross-country ski boot (2) from an upwardly pivoted position in the direction of the stand surface (5) of the binding main body (4), wherein at least one substantially unyielding elevation (14) is provided on the stand surface (5) of the binding main body (4), to the rear of the pivot axis (10) in the longitudinal direction of the binding main body (4), with which elevation (14) the sole (6) of the cross-country ski boot (2) in its unloaded state is arranged at a distance from the stand surface (5) of the binding main body (4).
