Abstract (en)

[origin: WO2018108567A1] The invention relates to a coating installation for coating components (7) with a paint, in particular for coating motor vehicle body components, comprising a coating booth (1) and, arranged in the coating booth (1), an application device (11), in particular a pressure head (11), for applying the paint to the component (7) located within the coating booth (1), wherein the application device (11) operates in a substantially overspray-free manner, with the result that the paint applied by the application device (11) is deposited without overspray substantially completely on the component (7) to be coated. The invention provides that no paint deposition facility (3) is arranged below the first coating booth (1).
