Abstract (en)

[origin: WO2018108417A1] The invention relates to an adjustable roll stabilizer (9) for a chassis of a motor vehicle, comprising an actuator (13) arranged between two partial sections (10,11) of a stabilizer, said actuator comprising an actuator housing (20) and an output (21) which is designed to produce a torsional moment acting between the partial sections. A damping element (23,25) is arranged outside of the actuator.
