Abstract (en)

[origin: WO2018114407A1] The invention relates to a controller for a motor vehicle (1) having an internal combustion engine (3), a transmission (4), and a cooling device (5) having coolant (5b) for cooling the internal combustion engine (3), wherein the controller (2) is designed to determine a desired minimum rotational speed for the internal combustion engine (3) on the basis of a temperature of the internal combustion engine (3) and/or a temperature of the coolant (5b) and to determine a desired transmission shifting position on the basis of the desired minimum rotational speed.
