Abstract (en)
[origin: WO2018108496A1] The invention relates to a transmission for a bicycle, having at least four switching elements, a drive shaft (1), a first planetary gear set (PS1), which is operatively connected to the drive shaft (1), and a second planetary gear set (PS2). The transmission is characterised in that a planet carrier of the first planetary gear set is rotationally fixed to a planet carrier of the second planetary gear set (PS2).
