Abstract (en)
[origin: WO2018116160A1] The invention solves the problem of obtaining the optimal parameters of use, wherein the pouring nozzle has a soft, elastically flexible ending resistant to breaking or biting. The dispenser with a cap for sachets is characterised in that the pouring nozzle (5) has a top region (9) made of a thermoplastic elastomer, forming a monolith with the rest of the body (1) of the dispenser, and the said pouring nozzle (5) is equipped in the top region (2) with an elastic partition forming a membrane (10) with a pair of intersecting slits.
