Abstract (en)

[origin: WO2018109209A1] The present invention relates to a pharmaceutical composition comprising, in a pharmaceutically acceptable carrier: a) at least one anti-CD303 antibody; and b) at least one anti-AMHR II antibody. The invention also relates to the combination of the two aforementioned antibodies a) and b) to form a combination product to be used simultaneously, separately or spread out over a period of time, for the prevention or treatment of urogenital cancers.
