Abstract (en)

[origin: WO2018108747A1] The invention relates to a section for quick cooling of a continuous line for treating metal belts, in which the belt is cooled by spraying a liquid, or a mixture of a gas and a liquid, onto same via nozzles arranged on either side of the belt, characterised in that, in the direction of travel of the belt, it comprises at least one row of fan nozzles across the width of the belt, followed by at least one row of cone nozzles across the width of the strip.
