Abstract (en)

[origin: WO2018109137A1] The invention relates to a tufting unit for a tufting machine (10), wherein the tufting unit has a yarn transport device (200) comprising a plurality of yarn grips (220), which are provided in order to circulate along a circulating track (205), and at least one inserting element (250). The at least one inserting element (250) is mounted above the circulating track (205) and pierces through the circulating track at least twice during insertion.
