Abstract (en)

[origin: WO2018108887A1] This duct (28) for the passage of liquid coolant for an internal combustion engine (2) of an automotive vehicle comprises a tubular portion (30) to allow the passage of a liquid coolant of a cooling circuit (6) of the engine (2), said tubular portion (30) comprising an upstream end (32) designed to be connected to a first functional member of the engine (2), and a downstream end (34) opposite the upstream end (32) and designed to be connected to a second functional member of the engine (2). The tubular portion (30) comprises at least one reception orifice (52) capable of receiving at least one element for heating the liquid coolant.
