Abstract (en)
[origin: WO2018109287A1] The invention relates to an energy generating station (1) comprising an electrical energy generating system (100) and a warm water and cold water production system (200) cooperating with the electrical energy generating system (100). Optionally, the energy generating station (1) also comprises a desalination module (300) and a climate-based energy generating system (400), both cooperating with the electrical energy generating system (100).
