Abstract (en)

[origin: WO2018108462A2] The invention relates to a method for providing a text-based description (15) of at least one route (A) for a journey made by a motor vehicle (10), wherein: a control device (14) determines route features (24) in respective pre-defined surrounding areas (23) comprising the route (A); at least some features from among the route features (24) are selected for the description (15) with the aid of a pre-defined selection criterion (30); the selected route features (31) are arranged in an output order (33) and an output hierarchy (34) with the aid of a pre-defined sorting criterion (30') and are entered in an output list (32); and a language text (15') forming the description (15) of the at least one route (A) is produced from the output list (32), by means of a text generation system (35) on the basis of pre-defined language generation rules, (36) and is output to a user.
