Abstract (en)
[origin: CN110387924A] Sanitary water outlet fitting. The invention relates to a sanitary water outlet fitting, comprising: a fitting base body (1), wherein the fitting base body is divided into a water inlet section (2) and an open upper side connected to the water inlet section; a water outlet section (3); a cover (17) on the open upper side of the water outlet section that is releasably fixed to the base of the fitting. In the water outlet fitting according to the invention, the open upper side of the water outlet section is used as a maintenance opening (4), wherein the cover closes the upper side of the water outlet section. A valve unit (5) and / or an insert element (6), which has a particle screen and / or a flow regulator, is accommodated in the accessory base in a manner accessible through the maintenance opening. The cover includes a support plate (18) mounted on the water outlet section through a detachable connection structure (22), a sealing device (19) surrounding the support plate on the bottom side, and a top plate (20) mounted on the support plate on the upper side. For example, the sanitary water outlet fitting can be used as a water outlet fitting on a washstand or bathtub.
